- IX. Presentations and discussion (1 week)

Date: Wed., 2:00 - 3:30pm

Location: **tba**

Brief description

The course will give an introduction to public international law and to European Union law. In its first part, by outlining the relevant legal basis, this course will provide insights into the legal mechanisms that govern inter-state relations and the role of international organizations for the international legal order. Part of the course will be

dedicated to the legal regime governing so-called areas beyond national sovereignty and international spaces – the environment, the High Seas and the Deep Seabed as well as airspace and outer space. In its second part, the institutional basis, the structure and the basic principles of European Union law will be presented. On the basis of case studies on milestone jurisprudence of the ECJ, the role of European Union Law for Member States will be explained.

The structure of the lessons is interactive, where active participation is both desired and expected.

During the course, every student will prepare a topic related to the program of the course of their choice and present the results orally (10 to 15 minutes). After the presentation, the topic at hand will be discussed among the class.

The course will be concluded with a short multiple choice exam.
